LETTER OF TRANSMITTAL.

THE PANAMA CANAL, CANAL ZONE,
DEPARTMENT OF HEALTH,
Balboa Heights, February 12, 1915.

Col. GEORGE W. GOETHALS,
*Governor of the Panama Canal,
Balboa Heights, Canal Zone.*

SIR: I have the honor to submit the following report of the operations of the department of health for the month of January, 1915.

Very respectfully,

CHAS. F. MASON,
Chief Health Officer.

GENERAL REMARKS.

No cases of yellow fever, smallpox, or plague originated on or were brought to the Isthmus during the month.

VITAL STATISTICS.

EMPLOYEES.

The health of the employees remained good during the month. The number of names on the rolls for the preceding month was 35,618.

The total number of admissions to hospitals and quarters was 988, a rate of 332.87 per thousand, as compared with 331.27 for the preceding month and 519.62 for the corresponding month of last year.

The total number of deaths from all causes was 17. Of these 13 died from disease, or 4.38 per thousand, as compared with 3.64 for the preceding month and 4.87 for the corresponding month of last year.

There were three deaths from malaria, as compared with one death for January of 1914. Of these deaths, one was a feeble old man of 68 years, who had been 23 years on the Isthmus and who had a complication of fatal diseases, of which malaria was only one element; another was a young woman who died of rupture of the spleen—a very rare accident in malarial cases; the third was a man who had been ill eight days without reporting for treatment

and was sent to the hospital in an unconscious condition, dying the next day. No other disease caused more than one death.

The constantly noneffective rate was 10.11, compared with 10.57 for the preceding month and 15.19 for the corresponding month of last year.

The total admission rate for malaria, hospitals and quarters, was 56.94, compared with 60.95 for last month, and the total noneffective rate 1.15, compared with 1.18 for last month; each of these rates being lower than for the same month last year. The diseases next to malaria causing the highest admission rates, in the order of their numerical importance, were: Diseases of the digestive system, venereal diseases, diseases of the respiratory and nervous systems. These five classes of diseases caused 50 per cent of all admissions to hospitals.

The admission rate for typhoid fever was 0.00 as against 0.33 for the previous month and 0.97 for the corresponding period of last year.

EFFECTS OF RACE.

The admission rate to hospitals and death rate for disease for black employees were 127.75 and 4.30 per thousand, as compared with 379.36 and 4.89 for white employees. The noneffective rate for disease and injuries for black employees per thousand was 8.51 as compared with 20.11 for white employees.

The admission rate to hospitals and quarters for malaria was 44.93 per thousand for blacks, as compared with 132.16 for whites.

The total death rate for Americans was 5.79, while among the Europeans there were no deaths. The admission rate to hospitals for disease for the latter was 651.66, compared with 329.79 for Americans. The admission rate for malaria to hospitals and quarters was 190.73 for Europeans, as compared with 121.50 for Americans.

DEPORTATIONS.

There were 22 deportations accomplished during the month, 11 employees and 11 nonemployees; for disease, 16; and for injury, 1; and 5 Spanish nonemployees without disease.

CANAL ZONE.

According to a census taken by the police and fire division between December 22, 1914, and January 1, 1915, the population of the Canal Zone was 31,160, to which has been added the soldiers arriving for Canal Zone garrisons since that date, giving a population of 31,480 for January. Among the residents there were a total of 39 deaths; of these 36 deaths were from disease, giving a rate of 13.72 per thousand, as compared with 12.37 for the preceding month and 16.34 for the corresponding month of last year. Of the total deaths from disease the percentage under 5 years of age was 44, compared with 61 last month.

There were 56 births reported, giving a rate of 21.32 per thousand. Of these births 19 were of white and 37 of colored children. There

was 1 death of white and 12 deaths of colored children under 1 year of age, giving an infant mortality per thousand of 53 for white and 324 for colored children, with a general average of 232. The percentage of stillbirths to total births was 5.

PANAMA CITY.

The population of the city is 60,373, among whom there were a total of 169 deaths; of these, 166 deaths were from disease, giving a rate of 33 per thousand, as compared with 39 for the preceding month and 35.62 for the corresponding month of last year. Of the total deaths from disease the percentage under 5 years of age was 55, compared with 55 last month. The principal causes of death showing an increase as compared with December were: Pellagra, 7, as compared with 6 for the previous month; bronchitis, acute and chronic, 10, as against 4 for last month; nephritis, 14, as against 13 for December.

There were 302 births reported, giving a rate of 60.03 per thousand. The infant mortality was 245 per thousand. The percentage of stillbirths to total births was 4.

COLON.

The population of the city is 29,331, among whom there were 56 deaths; of these, 52 were from disease, giving a rate of 21.27 per thousand as compared with 21.69 for the preceding month and 18.39 for the corresponding month of last year. Of the total deaths from disease the percentage under 5 years of age was 52, compared with 42 last month.

The principal causes of death showing an increase as compared with December were: Broncho-pneumonia, 4, as against none for last month; diarrhea and enteritis (under 2 years), 6, as compared with 2 for the preceding month, and cancer, 1, as against none in December.

There were 114 births reported, giving a rate of 46.64 per thousand. The infant mortality was 132 per thousand. The percentage of stillbirths to total births was 7.

HOSPITAL DIVISION.

ANCON HOSPITAL.

During the month the average number of patients constantly in hospital was 515. The per capita cost of patients in hospital proper was \$1.84 gross and 84 net. The per capita cost of patients in the insane asylum was 53 cents.

BOARD OF HEALTH LABORATORY.

The following work, in addition to routine, was performed:

The study of emulsions of crude carbolic acid was continued with special reference to their bactericidal action.

The emulsions as they are prepared with rosin soap are suspensions of minute particles which, when external influences are eliminated, must be considered to remain unchanged in composition regardless of the dilution. As they are formed when the proportion of water to the undiluted liquid is approximately 2 to 1, each particle must contain a relatively high proportion of toxic substances.

The emulsions behave as typical emulsoid colloids. The particles display an energetic Brownian movement; with a membrane permeable to electrolytes, they exert a definite osmotic pressure; and they also carry a negative charge of electricity, migrating to the positive pole under the influence of an electric current; when this charge of electricity carried by the particles is removed the emulsion is destroyed. The electrical nature of the particles is essential to their existence, and it is also a factor in the suppression of the specific chemical nature of the substances composing them. It also is very closely connected with the high bactericidal value of such emulsions.

Bacteria possess this same electrical property, but with this difference, the nature of the charge is very easily reversed. In an alkaline medium it is electronegative, and in an acid medium it is electropositive. In the presence of the particles of an emulsion of crude carbolic acid with soap, in an alkaline medium, the charge becomes positive and under the influence of the current the bacteria will travel to the negative pole. They become positive in the presence of the negative colloid and remove the charge from the particles of the emulsion. This removal causes the particles to break up, and the constituents of the emulsion are liberated around the bacteria in a concentration out of proportion to the degree of dilution.

During the month 5,000 smallpox vaccine points were prepared. Fifty points of this lot when tried out by the health officer of Panama on previously unvaccinated children gave 94 per cent of positive takes.

The preparation and collection of materials for the health department exhibits at San Francisco and Panama have been completed.

FARM FOR DISABLED.

The net per capita cost was \$0.537, as compared with \$0.536 for last month.

During the month work was continued on cleaning pasture and grounds for asylum buildings. Four chicken yards were completed and 150 concrete fence posts were made. The vegetable garden and nursery were cultivated.

INSANE DEPARTMENT.

During the month 14 patients were admitted, all of whom were first admissions with the exception of 2.

Twenty patients were discharged, including the following deportations: To Antigua, 1; Grenada, 1; Italy, 2; Fortune Islands, 1;

Montserrat, 1; San Salvador Island, 1; St. Lucia, 1; and the United States, 3.

The erection of the new asylum at Corozal is being pushed rapidly by the constructing quartermaster's department, and all of the buildings to accommodate the males, when they are transferred to that place on or about March 1, have been removed to the new site, and their interiors are being suitably rearranged.

The insane working force at the farm are still being employed on the grounds of the new site, dairy barn, and piggery.

In addition to the general sewing and mending being done at the institution sewing room, the female patients are daily engaged in preparing certain surgical dressings for use in the operating room and various wards of the hospital proper.

CHRONIC WARD.

There were 24.81 chronic and incurable patients constantly cared for during the month. The cost per patient per day was \$0.289.

Detailed statistics are shown in Table XIII.

COLON HOSPITAL.

The highest number of patients treated on any one day during the month was 48, the lowest number 28, the daily average being 36.74. The average number of employees constantly sick was 23.67. The average number of days' treatment per employee was 10.12. The per capita cost of patients was \$2.56 gross and \$1.60 net.

Detailed statistics are shown in Table XIV.

PALO SECO LEPER ASYLUM.

The number of patients under treatment at the end of the month was 49 as against 50 for the preceding month. The per capita cost per patient was \$0.81.

Detailed statistics are shown in Table XV.

SANTO TOMAS HOSPITAL.

During the month a total of 1,540 patients were treated, 28 less than for the preceding month. The daily average of patients in hospital was 467, as compared with 475 for December, and the total number of hospital days was 14,508, as compared with 14,728 for the preceding month.

Sixty-three deaths have occurred, with tuberculosis, pneumonia, and pellagra as the chief causes, in the order named.

The hospital has been caring for a great many pellagra cases recently as compared with former years, and upon investigating the records previous to 1911 it is found that this disease did not occur or went undiagnosed; the cases are of the severe type, with a rather heavy mortality.

Beriberi, diphtheria, and measles have been incident during the month. Beriberi is somewhat less than during the months

previously reported. Malaria has decreased perceptibly and the number of admissions for this cause is normal. The prevailing type is estivo-autumnal.

Detailed statistics are shown in Table XVI.

DISTRICT DISPENSARIES.

The dispensary having the highest admission rate for malaria was Corozal, with an average weekly percentage of 0.63; that having the lowest was Gatun, with a percentage of 0.06.

Detailed statistics are shown in Table IX.

SANITATION—CANAL ZONE.

The dry season is now well established, though the first week of the month was wet. With the change from wet to dry weather there has occurred the usual change of breeding places and the usual tendency for malaria to increase. However, the rate has kept lower than in any previous January and conditions are considered good.

Extensive ditch cleaning, grass cutting, and brush clearing are being carried out. Continued hydraulic filling between Corozal, Balboa, and Ancon has been watched carefully and any great production of anopheles prevented.

A sanitary gang has been kept at work in Mirazal district, and the district shows considerable improvement. Similar conditions obtain in numerous places on the west side of the canal, where, with the turning over of Culebra to the military during the coming month, there will be a considerable rural population of blacks that belong in no sanitary district. A sanitary gang for rural work will, therefore, be set to work on the west side.

The following communicable diseases were reported during the month:

Measles.....	3
Mumps.....	37
Cerebrospinal fever.....	1
Chicken pox.....	1
Tuberculosis.....	5
Whooping cough.....	23
Malarial fever.....	261
Dysentery.....	2

Detailed statistics are shown in Table XVII.

SANITATION—PANAMA.

COMMUNICABLE DISEASES.

Diphtheria.—Three cases were reported, one resulting in death. Of these three cases one was discovered to be a carrier.

Measles.—Three cases were reported. This is most inaccurate, as measles has been very prevalent throughout the city, as noted by the official vaccinators.

Cerebrospinal fever.—The only case of cerebrospinal fever reported proved to be a fatal one.

Mumps.—The prevalence of mumps throughout the city is still marked, and for the month there were 15 cases reported.

VACCINATIONS.

During the month 1,994 vaccinations were performed, bringing the total since April 1 to 14,727.

MOSQUITO, RAT, AND FLY WORK.

The antimalaria work in the vicinity of the exposition grounds was further extended to include the Bella Vista property, at which place residences are now under construction.

Mosquitoes.—An examination of the street cars at terminal points outside of the city revealed that anopheles mosquitoes enter and attack persons waiting in the cars. In the car barn after running hours an *A. tarsimaculata* was discovered hiding behind the controller box, where he was "tubed." This may account for a small number of cases in the section of the city far removed from the anopheles districts.

Flies.—During the month 302 deposits of fly larvæ were destroyed, which is a slight improvement over the previous months, and the prevalence of flies in the city is not very marked.

Rats.—During the month 1,159 rats were caught and submitted to laboratory examination for plague, with negative results.

It was observed in a new rat-proof building that a large rat came from behind a counter, jumped upon the same, and from thence to the wall shelves. Continuing, he jumped several feet to a drop-light wire, up which he ran, thence along a 1-inch water pipe, where he disappeared on his way to the second floor. This illustrates the difficulty in preventing rats from entering a building, as in this case the rat had evidently come in from some stables adjacent, and made his hurried trip to the second floor in search of food. It is believed, however, that if this rat was sick with plague he would not undertake such a strenuous journey, exposing himself in his feebleness to the danger of being killed. His very cunning would make him so cautious as to remain near his burrow or harbor, even though his food was not immediately plentiful.

GARBAGE.

With the entrance of the dry season the garbage was more satisfactorily cremated at Dump No. 1, where great improvement has been made in the approaches. Only 120 quarts of flies were trapped on the public dump during the month.

BUILDINGS.

The repairing of buildings was continued and 49 permits for such work were granted during the month.

Detailed statistics are shown in Table XVII.

SANITATION—COLON.

Physical examination of all school children both white and colored was made during the month and no defects were found which, in the opinion of the health officer, render them unfit to pursue their studies. Vaccinations were made in all cases where children were found not protected against smallpox by a recent scar. The result of these vaccinations was very satisfactory and certificates of successful "takes" were issued in about 95 per cent of the cases.

An agreement has been made with the supervisor of education of Colon Province for the introduction into the schools of the municipality of a course embracing catechisms on personal hygiene and elementary subjects relating to health education. Detailed plans for this work are being prepared.

Arrangements are being effected for a health education and publicity movement with special reference to antituberculosis measures.

The provisions of the new sanitary ordinance relating to fowls and animals were carried out during the month with very satisfactory results. The health officer has received a number of orders for the prescribed sanitary fowls coop, and several have already been installed for use of the merchants of the city.

Sixteen houses on the Mount Hope road were condemned for sanitary reasons and several houses have already been destroyed. The removal of these houses will immensely improve the health conditions of this district.

One bakery in Colon was condemned and temporarily closed in order to correct certain structural defects and unsanitary conditions.

An additional man for catching rats was put on and increased the catch about 80 per cent.

Of the 4,350 persons examined, 103 were vaccinated, and 4,247 were found protected.

The following cases of communicable disease were reported during the month:

Measles.....	12
Mumps.....	24
Whooping cough.....	6
Cerebrospinal meningitis.....	1
Tuberculosis.....	1

Detailed statistics are shown in Table XVII.

QUARANTINE SERVICE.

The total apparent decrease for the month for coast towns and foreign ports was 1,218. The excess of emigration over immigration from foreign ports was 803 plus 139 transients for Pacific ports. There were 276 more departures for coast towns than arrivals. No quarantinable diseases have appeared at the ports during the month.

Detailed statistics are shown in Table XVIII.

Cancer and other malignant tumors of the female genital organs		1		1
Cancer and other malignant tumors of the breast	1			1
Leuchæmia, lymphatic	1			1
Alcoholism, chronic		1	1	2

TABLE VI.—CAUSES OF DEATHS OF EMPLOYEES AND CIVIL POPULATION AND PLACES WHERE CHARGEABLE—Continued.

Disease.	Pana- ma.	Colon.	Canal Zone.	Total.
<i>Diseases of the nervous system and of the organs of special sense.</i>				
Encephalitis.....	1	1
Pneumococcus meningitis.....	3	3
Cerebral hemorrhage, apoplexy.....	3	1	4
Softening of the brain.....	1	1
Paralysis without specified cause.....	2	2
Convulsions of infants (under 5 years of age)....	2	2	4
Diseases of the ears.....	1	1
<i>Diseases of the circulatory system.</i>				
Organic diseases of the heart.....	1	1	2
Angina pectoris.....	1	1
<i>Diseases of the respiratory system.</i>				
Acute bronchitis.....	8	7	15
Chronic bronchitis.....	2	2
Broncho-pneumonia.....	8	4	12
Pneumonia (unqualified).....	4	1	5
Lobar pneumonia.....	3	3	6
Gangrene of the lungs.....	1	1
Asthma.....	1	1
<i>Diseases of digestive system.</i>				
Other diseases of the stomach (cancer excepted)...	1	1
Acute gastritis.....	1	1
Chronic gastritis.....	1	1
Diarrhea and enteritis (under 2 years).....	25	6	3	34
Colitis.....	2	2
Do.....	1	1
Appendicitis and typhlitis.....	1	1
Hernia, intestinal obstructions.....	1	1	2
Other diseases of the intestines.....	1	1
Cirrhosis of the liver.....	1	1	2
Abscess of liver (unqualified).....	1	1
Simple peritonitis (nonpuerperal).....	2	2
<i>Nonvenereal diseases of the genito-urinary system and annexa.</i>				
Acute nephritis.....	5	2	1	8
Bright's disease (chronic nephritis).....	9	4	13
Diseases of the urethra, urinary abscess, etc.....	1	1
Stricture of the urethra, nonvenereal.....	1	1
<i>The puerperal state.</i>				
Puerperal hemorrhage.....	1	1
<i>Diseases of the skin and of the cellular tissue.</i>				
Acute abscess.....	1	1
Other diseases of the skin and annexa.....	1	1	2

TABLE VI.—CAUSES OF DEATHS OF EMPLOYEES AND CIVIL POPULATION AND PLACES WHERE CHARGEABLE—Continued.

Disease.	Pana- ma.	Colon.	Canal Zone.	Total.
<i>Malformations.</i>				
Congenital malformations (stillbirth not included).....	1	-----	-----	1
<i>Diseases of early infancy.</i>				
New-born child.....	1	-----	-----	1
Congenital debility, icterus, and sclerema.....	2	-----	-----	2
Premature birth.....	7	-----	1	8
Congenital debility.....	2	-----	3	5
Malnutrition.....	15	7	2	24
Other causes peculiar to early infancy (including various consequences of labor).....	1	1	-----	2
<i>Old age.</i>				
Senility.....	1	-----	-----	1
<i>Affections produced by external causes.</i>				
Suicide by poisoning.....	-----	1	-----	1
Suicide by firearms.....	-----	1	-----	1
Accidental drowning.....	-----	-----	1	1
Traumatism by firearms.....	-----	-----	1	1
Traumatism by other crushings (vehicles, railroads, landslides, etc.).....	1	1	-----	2
Railroad traumatism.....	1	-----	1	2
Electricity (lightning excepted).....	-----	1	-----	1
Homicide by firearms.....	1	-----	-----	1
<i>Ill-defined diseases.</i>				
Cause of death not specified or ill-defined.....	6	-----	-----	6
Total.....	169	56	39	264
Stillbirths.....	13	9	3	25

TABLE XVII.—SANITATION.

The following is a summary of sanitary work performed and material expended during the month of January, 1915, in the Canal Zone.

Work requests on supply department:

Grass cutting.....	9
Screening.....	12
Miscellaneous.....	8

Work requests on engineering department.....	5
Notices served to abate nuisances.....	73
Arrests.....	5
Convictions.....	5
Inspections of closets.....	1, 879
Inspections of stores.....	38
Inspections of restaurants.....	4
Inspections of shops.....	126
Garbage cans emptied.....	77, 100
Closets disinfected.....	2, 966
Rat traps used daily.....	1, 796
Adult Anopheles destroyed in houses.....	21, 722
Adult Culices destroyed in houses.....	12, 894
Adult Stegomyia destroyed in houses.....	12
Containers found with Stegomyia larvæ.....	30
Larvacide used..... gallons.....	508
Crude oil used..... do.....	12, 186
Rats destroyed.....	567
Houses disinfected.....	1

SUMMARY OF ROUTINE WORK DONE BY THE HEALTH OFFICE, PANAMA.

Mosquito, rat, and fly work:	
Linear feet of ditches cleaned and maintained.....	17, 832
Linear feet of new ditches dug.....	10, 146
Number of cubic yards earth used in filling.....	0
Gallons larvacide used.....	633
Gallons crude oil used.....	2, 223
Square yards pools oiled.....	78, 655
Water containers treated.....	38, 165
Mosquito breeding places found (81 stegomyia).....	406
Fly breeding places found.....	302
Flies trapped (13,000 per quart)..... quarts.....	120
Number rats caught.....	1, 159
Number room disinfections.....	16
Garbage collections:	
Number loads garbage removed to dump.....	4, 072
Total number of cans garbage emptied.....	107, 685
Buildings:	
Number of buildings inspected.....	5, 019
Number of plans for new buildings approved.....	20
Number of permits granted for repairs to old buildings.....	49
Total number of permits granted.....	69
Number of buildings condemned.....	8
Number of buildings demolished.....	3
Street cleaning:	
Average number of square yards cleaned daily.....	600, 000
Average number of square yards street sprinkled daily.....	90, 000
Number of private properties cleaned during month.....	3
Number of notices served and nuisances abated.....	84
Vaccinations:	
Number of vaccinations during month.....	1, 994
Total number of vaccinations since Apr. 1, 1914.....	14, 727

WORK REPORT FOR COLON, CRISTOBAL, AND MOUNT HOPE.

[Health office, Cristobal, Jan. 31, 1915.]

Sanitation, general, Colon:	
Square yards street cleaned.....	3, 973, 226
Cubic feet fumigated (2 buildings).....	8, 896
Square yards street sprinkled.....	290, 600
Doses quinine issued (7 days only).....	2, 060
Square yards alleys maintained.....	674, 875
Private properties cleaned.....	39
Rats killed.....	319
Loads of yard garbage.....	405
Cans, garbage (2,148 cubic yards).....	67, 028
Linear yards ditches maintained.....	6, 764
Square yards vegetation removed.....	242, 000

Sanitation, general. Colon—Continued.

Parkway and E Street maintained.	
Chickens caught alive.....	14
Dogs caught alive.....	41
Dogs killed.....	40
Square yards oiled.....	11,475
Buildings inspected.....	3,550
Receptacles treated.....	25,400
Mosquito breeding places destroyed.....	103
Fly breeding places destroyed.....	111
Nuisances abated.....	259
Gallons larvacide used.....	103
Gallons crude oil used.....	111
Building, Colon:	
Plans approved.....	1
Permits to occupy issued.....	1
Permits to repair issued.....	89
Temporary permits to occupy issued.....	0
Bills for work for private parties, sales of garbage cans and stands and dump.....	113
Sewers, Colon:	
New connections made during month.....	3
Total connections made to date.....	1,169
Houses in which extensions were made.....	1
Outstanding permits.....	38
Sanitation, Cristobal:	
Cans, garbage (635 cubic yards).....	12,968
Loads yard garbage.....	127
Square yards vegetation removed.....	58,080
Square yards vegetation removed at wireless station.....	37,930
Square yards oiled.....	3,375
Receptacles treated.....	3,700
Mosquito-breeding places destroyed.....	17
Fly-breeding places destroyed.....	15
Buildings inspected.....	215
Gallons larvacide used.....	27
Gallons crude oil used.....	35
Sanitation, Mount Hope:	
Cans garbage (150 cubic yards).....	2,560
Square yards vegetation removed for Union Oil Co.....	29,260
Square yards oiled.....	47,690
Receptacles treated.....	16,300
Mosquito-breeding places destroyed.....	47
Mosquitoes caught in barracks—	
Anoph.....	176
Culex.....	1,044
Gallons larvacide used.....	42
Gallons crude oil used.....	865
Mount Hope Cemetery maintained.....	
Linear yards ditches maintained.....	14,200
Burials during the month.....	64

TABLE XVIII.—CONSOLIDATED REPORT OF QUARANTINE TRANSACTIONS AT THE PORTS OF BALBOA-PANAMA AND COLON-CRISTOBAL.

Vessels inspected and passed.....	157
Vessels held in quarantine.....	12
Total vessels entered.....	169
Vessels fumigated on arrival.....	8
Crew examined.....	10,232
Passengers examined (including 320 United States troops).....	3,887
Total persons examined.....	14,119

Persons vaccinated at ports of arrival because of compulsory vaccination law.....	463	
Persons vaccinated at ports of departure or en route because of compulsory vaccination law.....	1,326	
Total persons vaccinated.....		1,789
Persons held in quarantine at the detention houses to complete period of incubation of yellow fever and plague.....	263
